SKILLS

Frontend: HTML, CSS, JavaScript, TypeScript, React

Backend: Java, Node.js

Systems: Linux, Windows Server, Docker

Databases: MariaDB, MySQL

Other: Git, REST APIs, Artificial Intelligence, Self-Hosting

LANGUAGES

SPANISH	Native
ENGLISH	Upper-intermediate, B2 certificate

PROFILE

Web Application Development student with experience in frontend development, systems administration and self-hosted projects. Interested in modern web development, artificial intelligence and open-source technologies. Used to self-directed learning and hands-on work in real environments.

WORK EXPERIENCE

Web Developer Intern — Granadev

May 2026

- Built modern web applications for managing board game sessions, with artificial intelligence integration.
- Frontend development with React and TypeScript.
- Designed dynamic interfaces and reusable components.
- Teamwork in a professional environment using modern development workflows and tools.

Erasmus+ in Greece — Twinsoft

March 2025 – June 2025

Erasmus+ placement in Greece as a technician: administering, installing and repairing POS systems, printers, card terminals and local networks for all kinds of businesses, from hotels to local shops and companies.

PERSONAL PROJECTS

July 2020 – Present

- Development of web applications and websites with HTML, CSS, JavaScript, React and Java.
- Administration of Linux and Windows servers.
- Self-hosted services and virtualization on my own server.
- Hands-on experience with Docker, networking, databases and automation.
- Development and deployment of personal projects around streaming, home automation and self-hosted infrastructure.
- Basic knowledge of building and integrating artificial intelligence through APIs and automations.

EDUCATION

IES POLITÉCNICO HERMENEGILDO LANZ

(2025 – PRESENT)

Higher Vocational Degree in Web Application Development (DAW)

IES VIRGEN DEL CARMEN

(2023 – 2025)

Intermediate Vocational Degree in Microcomputer Systems and Networks (SMR)
